Subject: Fwd: FW: What must we do to end oppression of Palestinians

Dear Partners,

We appreciate everyone that reached out and checked on us and our partners, we are as safe as we can be.

What is happening in Palestine is unacceptable, the Israeli Zionist apartheid regime is executing forced displacement and genocide on Palestinian women, children, men and elderly.

We urge you to speak up in your countries and help us tell the truth of what is really happening in Palestine in the face of the strong media campaign against any Palestinian content documenting the massacres that are happening around the clock.

More than 4137 Palestinians were executed, %51 of which are children and women, and around 13,000 wounded since Saturday October 7th 2023, and over 1 million Palestinians were forced to leave their houses and migrate to other parts in Palestine, which are not any safer.

If you are willing to help spread the truth of the brutal attack on Palestinians, please check PPAN social media accounts where they share daily news and resources for you to follow:
